

APPALACHIAN AUDUBON SOCIETY

BIRD SEED SALE 2009

Questions about your order? Call 566-0149 Want more order forms to hand out? Call 732-5087

Volunteers are needed for a successful sale – for a couple of hours or a whole day. If you are able to volunteer on either day of the sale, please call 691-0288. This is a fun and rewarding team activity, benefiting the birds, the chapter, and the community. You don't have to be able to lift heavy bags of birdseed. There are volunteer positions for everyone!

SEED DESCRIPTION (List matches order form)

BLACK OIL SUNFLOWER SEED - Oil sunflower seeds are the 2-to-1 preference of wild birds commonly frequenting feeders. Oil sunflower has more meat per pound and the oil provides more calories and energy.

STRIPED SUNFLOWER SEED - Gray striped sunflower seeds. This is a larger seed than the black oil with high energy value, especially for larger birds like grosbeaks and cardinals.

BLENDED SUNFLOWER - A mixture of larger gray-striped seeds and high energy black oil seeds.

FAVORITE WILD BIRD FEED - A mixture of striped sunflower, cracked corn, millet, wheat, and milo.

BIRDSNACK WILD BIRD FEED - Triple the sunflower in "Favorite" blended with canary seed, cracked corn, hulled oats, wheat, white millet and peanut hearts.

FLYERS' CHOICE - A premium selection of high energy ingredients to attract the most colorful birds. Contains more than 50% sunflower seeds plus millet and safflower.

CARDINAL'S CHOICE - A blend of oil sunflower, sunflower kernels, and safflower.

CHICKADEE'S CHOICE (NEW) - sunflower kernels, tree nut pieces, peanuts, oil sunflower, striped sunflower, and safflower.

WOODPECKER'S PICK (NEW) - tree nut pieces, peanuts, corn, sunflower kernels, dried fruit, and pepitas.

SUNFLOWER MEATIES - A combination of shelled and unshelled sunflower seeds.

SUNFLOWER HEARTS – High energy sunflower seeds but with no shells to clutter the lawn.

PEANUT HEARTS – Finely chopped peanuts are enjoyed by a wide variety of birds.

ROASTED/SHELLED PEANUTS – Relished by woodpeckers, nuthatches, chickadees & more.

NYJER (THISTLE) SEED - High in oil content, for use in nyjer/thistle feeders, for goldfinches and other small song birds.

FINCH DELIGHT - A mixture of small sunflower hearts, canary and nyjer seeds.

SAFFLOWER SEED - A favorite of cardinals, and discourages squirrels.

CRACKED CORN – Coarse-sized bits of corn for ground feeding birds. (Last year we offered medium-sized, but have found the coarse to work better in damp weather.)

WHITE MILLET – Enjoyed by ground feeders, including mourning doves and others.

SHELL-LESS SELECT (NEW) - premium blend with no shells for less waste and mess. Contains millet, sunflower seeds, peanuts, tree nut pieces, and pepitas.

SUET - Made from beef suet (fat) or peanut butter mixed with seed and formed into a shape. Bells come in a nylon net ready for hanging. A favorite of jays, orioles, tanagers, chickadees, nuthatches and mockingbirds.
